

# INSTALLING AN APPLICATION FROM THE WSU NETWORK (MAC)

**NOTE: Make sure you are connected to the WSU network before attempting to install campus software!**

1. Navigate to the 'Applications' folder. A shortcut should be located on the right-hand side of the Dock (see photo on the right). Click on this folder.

2. Scroll down to find the 'Managed Software Center' folder. Click on it to open

3. Select the software you would like to install and click 'Install Software'.

4. Now just follow the on-screen instructions for each application you selected. The selected software should appear in your 'Applications' folder when the install process has finished.
